

## ACTIVATE OPENBRAVO TRIAL LICENSE

1. Download this [file](#)
2. Replace ActivationKey.java in  
`<openbravohome>/src/org/openbravo/erpCommon/obps`  
with the file has been downloaded before.
3. Make sure you have done one of this command
  - `$ ant smartbuild`
  - `$ ant compile.complete.deploy`to compile java file has been replaced.
4. Run this query from database openbravo  
`UPDATE ad_system SET instance_key='instancekey',  
activation_key='activationkey' WHERE ad_system_id='0'`  
you can replace 'activationkey' and 'instancekey' with any character you want. No specified format for this, but you **CAN'T** download commercial module from module management window. This way just for activating commercial module that has been included in the openbravo source, e.g: Financial Management, etc.  
You can install commercial module manually if you have the \*.obx file related the module.
5. Start or Restart your tomcat
6. You do not need to activated instance from Instance Activation window, because of the way it has been help you to activated it. Just check the status in this window.

NB: Tested for Openbravo 3.0 PR15Q4.4 and less
